Elegance and functionality

Other glazing beads available:

Satisfy your demands, because this profile system meets all the requirements for sophisticated window designs. Highly dense surfaces not only make the profile particularly easy to care for, but also guarantee an exceptionally long service life. The 5-chamber profile system with a construction depth of 73 mm and 2 seals prevents thermal bridges and cuts energy costs substantially. The intelligent structural design of the profile, featuring large steel reinforcements, ensures excellent stability and reliable functionality.

Colours: wide choice of colours for smooth and wood imitation profiles, including fine wood.

Application:

Side and bottom hung windows, tilt-and-turn windows, secondary entrance doors, folding or tilt-and-slide doors

Technical data:

Technical Specifications $U_f = 1.3 \text{ W/m}^2\text{K}$ Sound protection up to 46 dB. Burglary resistance class 2* to EN1627 RC2 (Wk2).
